EXECUTIVE CONCEPTS INC.
MANAGEMENT CONSULTANTS

DRP - The Distribution Requirement Planning module designed by Executive Concepts Inc. This AccountMate add-in has been designed to provide distribution companies with functionality that will ensure that they have the right inventory at the right time.

AccountMate provides some capabilities with regards to managing inventory levels. This may work well for companies that have a consistent sales pattern. DRP provides a more effective way of managing inventory levels based on sales forecast (capability provided by DRP), safety stock, and AccountMate PO, SO, and IC data.

You can identify by item, whether you want to plan by day, week, or month. DRP also has an option to create POs or PO quotes based on the required calculations.
